LabTech instructor launch checklist

1. Create a course with a clear description and enrollment choice.
2. Add ordered chapters and explain the goal of each activity.
3. Preview lessons, quizzes, interactions, and accessibility.
4. Set points in the gradebook; use category weights only if desired.
5. Configure a VM template before publishing a lab.
6. Configure an AI provider before assigning a scenario.
7. Test a learner submission, feedback, and export.
8. Activate the course and enroll a test learner.

This handout belongs to the example course and can be adapted.
